The Mitz Fix

When Is The Lancer Evolution Final Edition Coming To Australia?

When is the Lancer Evolution Final Edition coming to Australia?

It's a question that's on the lips of Lancer fanatics across the country following Mitsubishi's announcement that it will be **discontinuing its iconic fast sedan.**

Lancer Evolution or simply Evo is a name that has become legend in the auto world.

Famously, every one of the ten Lancer Evolution models since 1992 have used a 2.0L turbocharged engine and all-wheel drive. Over the years, the release of new models has been met with huge excitement – and why wouldn't it? Every Evo seems to defy physics and push the boundaries of performance.

The current **Lancer Evolution X** weighs just over 1500kgs, sports 217kW of power, sprints to 100kms in around 5 seconds and can reach speeds of 240kms – figures which embarrass some cars twice its price.

Whilst it's going to be sad to see the Lancer Evolution go, we're pumped about the arrival of the Lancer Evolution Final Edition – a special 'last hurrah' of which **only 150 will reach Australia**.

Here's what you need to know:

- **When is the Lancer Evolution Final Edition coming to Australia?**

We're anticipating that the Lancer Evolution Final Edition will make it to Oz in the final quarter of this year – but you'll need to act long before that if you're interested in purchasing one. **Register your interest with our team** for more information.

- **What's going to be under the hood?**

We can't confirm official power and torque figures at this stage, but do know that upgrades such as sodium-filled exhaust valves have been made to the mechanics, which could equate to an increase in power.

- **Is the Final Edition going to look different from the Evolution X?**

When the Evolution Final Edition lands in Australia, there'll be the option of five colours (white, blue, black, grey or red) along with your choice of a black or white roof. The Final Edition will feature custom badging as well as changes to the front grill and minor interior tweaks.

- **When is the regular Evolution X being discontinued?**

The last Evolution X model will cease production in March 2016. They'll continue to be sold in Australia until stocks are depleted, but like all things, it's wise to get in early for your preferred choice of colour and transmission.

So, is this the end of Evo?

Right now, the Lancer Evolution Final Edition will be the last Lancer Evo model ever, with Mitsubishi confirming they have no plans for a 'rally-bred' Lancer any time soon. However, this may not be the end of the Evo legacy – only recently Mitsubishi global boss Tetsuro Aikawa hinted that we may see the Evo badge again, but more likely on an ASX-based model.

We'll wait and see, but in the meantime don't miss you chance to secure a slice of Lancer history.
